

Where **Canadian Auto Insurance Rate Regulators** Converge!

**Canadian Automobile Insurance Rate
Regulators presents:**
**Preparing for & Insuring
Tomorrow's Mobility
Summit**

Monday, September 17, 2018

**Sheraton Suites Eau Claire
Calgary, Alberta**

Join us for a full day event focused on Canada's evolving mobility ecosystem. We tailored the agenda to increase awareness of the technological and business model changes that will affect mobility in the future. You will learn from the speaker's experience as they share their perspectives on how vehicular technology and insurance needs will change in Canada as autonomous vehicles evolve and enter our marketplace.

Our committee has devised a program packed with high-profile speakers!

Summit

Topics Include:

- Disruption in Mobility
- Understanding Vehicular Connection
- Semi-Autonomous and Beyond
- Learnings from California - World's Leader in Autonomous Vehicle (AV) Testing
- Legalizing AV Usage in the UK & the Role of Insurance
- An Insurer's Perspective on AVs

Presentations from:

- Regulators - UK & United States
- MARCON - Canada
- HERE Technology - United States
- Volvo - Sweden
- Tesla - Singapore
- Toyota - United States
- Aviva - Canada

After July 1, 2018 - \$300
Please have registration in by
August 1, 2018**

CARR 2018 Fall Conference Agenda

Monday September 17, 2018
Preparing for & Insuring Tomorrow's Mobility Summit

All sessions will be held in the Wildrose North Room
All meals/snacks will be served in the Main Foyer

7:30 am to 8:30 am	Breakfast/ Registration
8:45 am to 9:00 am	Opening Remarks AIRB Chair
9:00 am to 10:00 am	Disruption in Mobility Discussion of the factors contributing to changes in mobility and the facilitators of these changes. Description of new business models and trends that have already reached the market. High level view of vehicular automation and impacts pertaining to expected changes in insurance and regulation. Catherine Kargas, Vice-President MARCON
10:00 am to 10:15 am	Morning Break
10:15 am to 10:50 am	Understanding Vehicular Connectivity Connectivity promises to improve road safety and circulation fluidity. Focus of the presentation: helping attendees understand the technology and its potential impact on vehicle usage, including issues of cybersecurity. Monali Shah, Director of Intelligent Transportation, HERE Technologies
10:50 am to 11:25 am	Semi-Autonomous and Beyond With billions of kilometers of semi-autonomous driving data, thanks to the usage of the Autopilot feature by Tesla owners, the company can share information regarding its technology, the progression in vehicular automation, the reasoning behind the InsureMyTesla program as well as future perspectives regarding vehicular technology and insurance needs. Tesla's perspective of how select jurisdictions have addressed changing mobility. Leopold Visser, Director of Financial Services Tesla Motors Inc.
11:25 am to 12:00 pm	The Future of Driving Volvo's Drive Me project, started in 2013 and has provided the company with many insights and learnings. This presentation will provide an overview of the technology (including learnings from the Drive Me project), its safety benefits, and risks associated business models. It will also touch upon potential regulatory challenges associated with changes in vehicular technology. Anders Eugensson, Director Government Affairs Volvo Car Corp.
12:00 pm to 12:35 pm	Vehicular Automation & the Driver Toyota Research Institute is developing two different automated driving modes in parallel: Guardian and Chauffeur. This presentation will provide an overview of these vehicular technologies, their benefits as well as issues associated with cyber risk. It will also touch upon potential regulatory challenges associated with changes in vehicular technology. Jane E. Lappin, Director, Government Affairs & Public Policy, Toyota Research Institute
12:35 pm to 1:30 pm	Lunch
1:30 pm to 2:15 pm	Learnings from California: World's Leader in Autonomous Vehicles Since 2013, California DMV has issued AV Testing Permits to more than 40 companies, making the state a leader in AV testing. This presentation will focus on DMV's AV testing learnings, the regulations adopted by the state to date, potential next steps in a context of US DOT Advanced Driving Systems guidelines. Bernard Soriano, Deputy Director California Department of Motor Vehicles

2:15 pm to 3:00 pm	<p>Legalizing Autonomous Vehicles Usage in UK & the Role of Insurance</p> <p>A description of the steps and reasoning that led to the tabled legislation, with specific emphasis on the insurance provisions within the Automated and Electric Vehicles Bill.</p> <p>Matthew Eglinton, Senior Policy Advisor and CCAV Consultation Manager, Center for Connected and Autonomous Vehicles, UK</p>
3:00 pm to 3:15 pm	<p>Afternoon Break</p>
3:15 pm to 4:00 pm	<p>An Insurer's Perspective of Autonomous Vehicles</p> <p>This presentation will highlight Aviva's reflections regarding AVs and their impacts on insurers. Recommendations will be made regarding regulatory changes for the protection of the average Canadian.</p> <p>Karin Ots, Senior Vice-President Aviva Canada</p>
4:00 pm to 4:45 pm	<p>Panel Discussion of the Insurance and Regulatory Challenges Related to Autonomous Vehicles</p> <p>Catherine will lead a discussion of regulatory (and more specifically, insurance) issues and how they are being addressed in California, the UK and Canada. Future regulatory directions will be explored.</p> <p>Karin Ots, Senior Vice-President Aviva Canada Bernard Soriano, Deputy Director California Department of Motor Vehicles Matthew Eglinton, Senior Policy Advisor and CCAV Consultation Manager, Center for Connected and Autonomous Vehicles, UK Catherine Kargas, Vice-President MARCON TBD, Insurance Bureau of Canada</p>
4:45 pm to 5:00 pm	<p>Closing Remarks</p> <p>AIRB Chair</p>
